

K-LOVE provides positive, encouraging, and uplifting continuous music to listeners in my area. I listen because I am a Christian and love to listen to contemporary, worshipful music. But, it also provides hope and help for those who may be searching for purpose and direction for their lives who may tune in by accident. It (to my knowledge) is the only broadcast of this type in my area (although I believe it may have a "sister" station on another frequency location locally. Please do not do anything that would allow LPFM broadcasts to take priority over this FM translator broadcast. The FCC seems to be allowing, little by little, more unwholesome programming on TV and radio that does not reinforce the values that I and millions of other citizens of this country think are important -- love for each and every person, compassion, encouragement, and respect. We have LOTS of other stations that people can choose; please DO NOT take this choice from we who value it so much.
